A PARTNERSHIP YOU CAN TRUST

Clearpath provides consulting expertise based on our team's extensive risk mitigation experience developed over many years and around the world. We have a proven record of transparency, objectivity and of acting in the best interests of our clients as a trusted partner.

PROVEN RECORD OF SUCCESS

We have partnered with clients in business, government and non-profit sectors in a broad range of industries, environments and locations.

- **Security Program Audit** – Through a comprehensive audit and assessment of a multi-million-dollar guard contract for a major healthcare provider, we uncovered over \$2 million in overcharges to the client.
- **Corporate Policy Development** – Working as a trusted partner with an industry leading, high-profile, major technology research & development company, we developed comprehensive Intellectual Property Protection and Duty of Care programs.
- **Threat Determination** – A global US Fortune 100 company was facing heightened threats and increased protest activity. We developed a tailored program of threat assessments, vulnerability identification and ongoing threat monitoring which allowed the company to take action to better protect at-risk personnel and assets.

RISK MITIGATION SOLUTIONS

Since 2006, Clearpath has been a leader in developing resource sensitive and reality-grounded solutions to help our clients protect their people, property, information and reputation. The Clearpath Risk Mitigation team has extensive experience creating, implementing, and managing security programs throughout the world. We have a proven record of success and have operated in more than 100 countries.

SAMPLE SOLUTIONS

POLICY DEVELOPMENT: Policies and procedures are the logical starting point to create an effective risk mitigation program. We'll assist you in developing individual risk and security policies or a completed risk manual.

CONSULTANT CHIEF SECURITY OFFICER (CSO): Medium and small sized companies face many of the complexities and risks of larger firms but with fewer resources. Enter the Consultant CSO. Our trusted advisors will work with you to develop and execute a comprehensive risk mitigation strategy. Our experts have firsthand experience creating, managing and directing multifaceted safety and security programs, to include: uniformed guard services, executive protection, physical security and investigations. Get the benefits of a full-time Chief Security Officer as our experts integrate into your team and risk mitigation strategy at a fraction of the cost.

- Emergency Preparedness
- Supply Chain Vulnerability Analysis
- Investigative Services
- Security Force Quality Control and Optimization
- Risk Program Training and Mentoring
- Policy Development
- Consultant CSO
- Contract & Bid Development

PROTECTING YOUR BUSINESS IN AN UNCERTAIN WORLD

- Businesses worldwide are at risk from a seemingly ever growing list of threats. Reducing organization vulnerability gaps and building resource-sensitive protections make good business sense.
- Asset and Monetary Loss: Fraud (internal or external actors), intellectual property loss and theft are common threats to business operations and can devastate the bottom-line and needlessly impact financial results.
- Lack of Business Continuity Planning: Business interruption due to a sudden natural disaster, conflict or social unrest, or even a labor strike can – without basic assessment and continuity planning – cripple an organization's ability to continue to operate not only in the short term but also to maintain market share in the longer term.
- Reputation Damage: A company that is not perceived as being well managed and able to maintain a standard of Duty of Care that protects assets, personnel and customers may suffer stock devaluations, a loss of confidence in an executive team and damage to the overall brand.
